EDUCATION

BSc Honours in Computer Science

Sep 2024 – May 2028

National University of Science and Technology (NUST) — Bulawayo, Zimbabwe

PROFESSIONAL EXPERIENCE

Pygentech — Software Developer Intern

Nov 2024 – Sep 2025

- Built and maintained client websites using React, HTML/CSS, and JavaScript.
- Developed and consumed RESTful APIs with Django REST Framework.
- Collaborated with cross-functional teams; managed data across PostgreSQL, MySQL, and SQLite.

Freelance Software Developer — Upwork & Freelancer.com

2024 – Present

Active online as **Tadaishe** on [Upwork](https://www.upwork.com) and [Freelancer.com](https://www.freelancer.com).

- Delivered full-stack web, desktop, and automation projects for international clients.
- Worked across time zones on React, Django, Python scripting, and data-driven applications.

TECHNICAL SKILLS

Frontend	React, Tailwind CSS, JavaScript (ES6+), Framer Motion, Bootstrap, Streamlit, Responsive Design
Backend	Python, Django & DRF, Java, PostgreSQL, Redis, Web Scraping (BS4/Selenium), Task Automation
Data & Trading	Pandas, NumPy, TensorFlow, TA-Lib, Matplotlib/Plotly, Jupyter, REST APIs
DevOps & Tools	Git & GitHub, Docker, Linux (Kali/Ubuntu), Bash Scripting, Wireshark
Mobile	React Native, Expo, WatermelonDB, Zustand, Reanimated, Dart & Flutter

PROJECTS

StudentHousing.co.zw — Full-Stack Web Application

[\[Live\]](#) [\[GitHub\]](#)

Python · Django · DRF · React · Tailwind CSS · PostgreSQL

- Identified and solved the lack of a centralised off-campus housing platform at NUST; built and deployed the now-official studenthousing.co.zw.
- Integrated Google Maps API, email notifications, payment gateway, and real-time data handling.

Ares Terminal Pro — Algorithmic Trading Desktop App

[\[Website\]](#) [\[GitHub\]](#)

Python 3.12 · AsyncIO · Flet · Pandas · NumPy · SciPy · MetaTrader 5 API · PyInstaller

- Multithreaded engine processes real-time tick data across 6+ simultaneous assets with zero UI latency.
- Integrated Monte Carlo simulations for risk modelling and linear regression for automated technical analysis.
- Implemented a self-healing connection protocol enabling 24/7 unattended operation.

Exodus Engine — AI-Powered Self-Development Mobile App

[\[Website\]](#) [\[GitHub\]](#)

React Native · Expo · WatermelonDB · Gemini API · Zustand · Reanimated

- Offline-first architecture using WatermelonDB for zero-latency storage and complex schema migrations.
- Integrated Gemini API to dynamically generate personalised skill-progression roadmaps with strict JSON parsing.
- Built 60fps physics-based animations with React Native Reanimated for a seamless UX.
